312-2251095396-S	Munich (Bavaria)	1	Software-Developer Front-End of Embedded Systems (m/f)	<p>Our company has been a German manufacturer of IP-based software solutions for video-analysis and video-management since 1965, we specialise in technical solutions for alarm and security systems. To strengthen our developer team, we are looking for a Software-Developer Front-End of Embedded Systems (m/f) in our IPS Intelligent Video Analytics business unit in Munich, Germany Are you ready to help shape the next generation of software-based video surveillance systems? When it comes to quality, would you like it to be up to you? Would you like to work independently, but in a small, dynamic team? Our video-analysis software products run as embedded systems in smart cameras; they are service-products and do not contain a GUI. To configure and monitor them, external front-ends are created based on web technologies - these are Rich clients and run completely autonomously. The work places the highest demands on your professional expertise, your quality-awareness and your reliability. After all, it is literally about the security of our customers. Are you communicative and quick-witted? Then you are at the right place with us! Your Responsibilities: · Independent design of complex front-end programs · Independent development with the aid of web technologies and the use of standardised libraries and tool sets · Validation and optimisation of the software you develop and provision of the technical documentation</p>	31/10/2017	zav-ips-baden-wuerttemberg@arbeitsagentur.de and cc eures@afolmet.it

4907931	UNITED KINGDOM	1	PHP DEVELOPER	Required profile: PHP Developer No of available vacancies: 1 Place of work: Unit 3, Greenway Business Centre, Doncaster Road, Bristol BS10 5PY Deadline for applications: ASAP Description of the task: We need an enthusiastic PHP web developer with a strong understanding of Object-Oriented PHP. Tasks include the occasional large project, multiple mini-projects, adding new features to existing systems, and fixing bugs that have come to light. A notable amount of existing code is in ASP and legacy PHP and needs to be recoded in OOP PHP. We have a large amount of legacy code, but new projects will be written in PHP OOP e.g. using the NetBeans PHP IDE, the CodeIgniter MVC framework and the bootstrap framework for external websites. We are looking for a dependable PHP developer to write logical, well-commented code and to build on and improve existing systems. Create robust bespoke systems to increase efficiency in the business. Create intuitive and fast user interfaces - for both internal staff and external customers. Balance the feedback of users with the requirements of your manager, and manage your workload to ensure an appropriate balance between time, quality and budget. You must also be willing to muck in with technical support although this isn't the main focus of the role. Work within a culture of good organisation and clear, timely reporting. JV's Contract: Type of contract: 18 months contract Renewable: strong likelihood of further contracts being offered Hour /week.: 40 Salary (currency): (25,000-(33,000 per annum depending on experience Further benefits: n/a Travel expenses: n/a Transfer benefits: no Accommodation: no Other: n/a Candidate's requirements: Educational level: Computing/Programming-related degree or equivalent Professional experience: PHP programmer - either a very capable programming graduate or a mid-level developer with a minimum of 4 year's relevant industry experience including at least 18-months solid programming in PHP OOP Language Skills: English B1/B2 Computer skills: Excellent knowledge of the NetBeans PHP IDE and the CodeIgniter MVC and bootstrap frameworks, significant experience with SQL. Driving license: not required Other requirements: Intermediate level of English Language. Applicati on: How to apply: Apply via email to Mrs Glynda Glasner at vacancies@zigzageducation.co.uk with your CV and Letter of application in English (applications in other languages won't be taken into consideration) and cc eures@afolmet.it. We would like to know: - which job you are applying for and where you first saw it advertised - your IT skills and all GCSE/ A Level, or equivalent (qualifications and all grades) - your current circumstances, why you are applying for this job - when you would be interested in starting and what your medium-term plans are - what about this job specifically appeals to you - details of your PHP experience and projects you have worked on individually and as part of a team - how you feel your skills your aspirations are met by this job - your salary expectation, together with your current responsibilities and salary Successful applicants will be invited to a 4-hour interview process which include a written test and a set of challenging practical PHP programming tasks. Please let us know if there is anything you would like to know in advance of a possible interview. We reserve the right to view LinkedIn or other public social-media profiles of interview candidates.	31/12/2017	eures@afolmet.it

20151222733	Francia	30	YFEJ 5.0-DATA SCIENTISTS	The role of the data scientist is to participate in the identification, implementation and growth of the it solutions. The data scientist is part analyst, part artist: comfortable working as a software engineer and a quantitative researcher; the Data Scientist is capable of staring at data and spotting trends, wanting to learn and bring change to an organization. The data scientist explores and examines data from multiple disparate sources and sifts through all incoming data with the goal of discovering a previously hidden insight, which in turn can provide a competitive advantage or address a pressing business problem. The data scientist does not simply collect and report on data, but also looks at it from many angles, determines what it means, then recommends ways to apply the data. The data scientist is inquisitive: exploring, asking questions, doing 'what if' analyses, questioning existing assumptions and processes. Armed with data and analytical results, the data scientist then communicates informed conclusions and recommendations across an organization's leadership structure. Skills - Understand the business of the customer and understand the main performance indicators that can be leveraged to improve activity or decrease costs - Work closely with customer facing teams and the customers to identify and answer relevant clients questions using appropriate statistical techniques on available data. - Drive the collection of new data, both internal and external, and ensure its accuracy. Drive the refinement of existing data sources. - Communicate findings to all relevant internal and external contributors in a way that is accessible to each audience. Experience with Python, R, Matlab, Scala with scoobi, Hadoop/Impala, tableau or equivalent, Unix is a plus Please send your CV in English to: eures@afolmet.	31/12/2017	eures@afolmet.it
